Aspiring Java Full Stack Developer

Anirudh Yadav is an aspiring Java Full Stack Developer with a strong passion for building end-to-end web applications. His focus lies in crafting clean, efficient, and maintainable code across both frontend and backend technologies, ensuring robust and scalable solutions.

With a solid B.Tech background and 8 months of intensive practical training, Anirudh has gained proficiency in developing scalable applications using modern tools and frameworks. He is deeply committed to continuous learning and is eager to contribute his skills and dedication to real-world development teams, making a tangible impact on projects.

Core Technical Skills

Java & Spring Boot

Expertise in backend development and building robust REST APIs.

Git & GitHub

Skilled in version control and collaborative development workflows.

MySQL

Proficient in relational database management and optimization.

React.js, HTML, CSS, JS

Comprehensive frontend development expertise for dynamic user interfaces.

Development Tools & Environments

API Testing & Documentation

- Postman
- Swagger UI

These tools are essential for thorough API testing and creating clear, comprehensive documentation, ensuring seamless integration and understanding for other developers.

Primary IDEs

- VS Code
- Eclipse
- STS (Spring Tool Suite)

Utilizing these powerful Integrated Development Environments ensures efficient coding, debugging, and deployment of web applications, streamlining the entire development lifecycle.

Anirudh's proficiency with these development tools and environments underscores his capability to manage and execute projects effectively, from initial coding to final deployment, ensuring high-quality and reliable web solutions.

Key Capabilities

Full Stack Web Development

Proficient in developing comprehensive web solutions, covering both frontend and backend aspects to deliver complete, functional applications.

REST API Design & Integration

Skilled in creating and integrating robust, scalable RESTful APIs, enabling seamless communication between different software components.

Frontend-Backend Connectivity

Ensuring seamless and efficient integration between the user interface and server-side logic, providing a smooth and responsive user experience.

Database Operations

Expertise in managing and optimizing database interactions, including schema design, querying, and performance tuning for efficient data handling.

Code Testing & Debugging

Committed to ensuring high-quality, bug-free code through rigorous testing methodologies and effective debugging techniques, leading to reliable software.

Experience: JSpiders Training

Anirudh completed an intensive 10-month Java Full Stack Development Training program at JSpiders, spanning from November 2024 to the present. This comprehensive program provided him with hands-on experience and deep knowledge in various critical areas of web development.

During this rigorous training, he mastered end-to-end development processes, gaining proficiency in core Java, Spring Boot for robust backend solutions, Hibernate for efficient ORM, and essential frontend technologies including HTML, CSS, JavaScript, and ReactJS. Additionally, he developed strong skills in SQL for database management.

This practical training has equipped Anirudh with a strong foundation in building modern, scalable, and high-performance web applications, preparing him for real-world development challenges.

Education & Academic Foundation

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow

Bachelor of Technology - BTech, Computer Science and Engineering

(August 2020 - July 2024)

Anirudh's academic journey at AKTU provided him with a robust theoretical foundation in computer science, covering fundamental concepts and advanced topics essential for a career in software development.

ITM

Bachelor's Degree

(2020 - 2024)

His studies at ITM further complemented his technical education, broadening his understanding of various disciplines and enhancing his problem-solving abilities.

Anirudh's strong academic background in Computer Science and Engineering from these institutions provides a solid theoretical underpinning for his practical development skills, enabling him to approach complex technical challenges with a well-rounded perspective.

Top Skills

Spring Framework

Proficient in leveraging the Spring
Framework to build robust, scalable, and
enterprise-grade applications, utilizing its
various modules for efficient development.

Cascading Style Sheets (CSS)

Skilled in creating visually appealing and responsive web designs using CSS, ensuring an excellent user experience across different devices and browsers.

Object-Oriented Programming (OOP)

Possesses a strong understanding of fundamental Object-Oriented Programming principles, enabling the development of modular, reusable, and maintainable code.

Certifications

Certified Ethical Hacker (CEH) Quiz Certification

This certification demonstrates Anirudh's proactive commitment to understanding cybersecurity principles and best practices. This knowledge is invaluable in developing secure web applications, ensuring data integrity and protecting against potential vulnerabilities, which is a critical aspect of modern software development.

Let's Connect!

Anirudh is actively seeking challenging Java Full Stack Developer roles or internships where he can apply his acquired skills, grow professionally, and contribute meaningfully to impactful projects. He is eager to join a dynamic team and make a significant contribution.
